## **<u>AETiC</u>**: Detailed Formatting Instructions

(Version: 17022021)

1	Page Layout
1.1	Paper Size: A4 (W: 21 cm and H: 29.7 cm)
1.2	Margins: Top (2.5 cm), Left (2.5 cm), right (1.9 cm), Bottom (1.9 cm)
2	Headers and Footers
2.1	Header and Footer information included in the template should NOT be removed.
2.2	Make sure that the "Different first page" should be checked, since the first page header and
	footer are different than those of the other pages.
2.3	Position: Header from Top (1.27 cm) and Footer from Bottom (1.27 cm)
2.4	Authors need to update the information (in green texts) on the first page footer with the names of the authors as well as the article title. Any information in yellow texts, will be updated by the editorial office.
2.5	Authors name should appear as they are stated in the Authors' Affiliation section, without
	any superscripts.
3	Article Title
3.1	Font: Palatino Linotype, Font Size: 24, Alignment: Centred, No Indentation, No Spacing.
3.2	The title should be expressed in Title Case i.e. all words are capitalised, except non-initial
	articles like "a, the, and", etc.
3.3	Keep the title as short as possible, preferably within 10-12 words.
4	
4	Extra Line Breaks
4.1	Extra Blank Line - Font: Palatino Linotype, Font Size: 10, Alignment: Centred, No Indentation, No Spacing.
4.2	Extra Blank Line should be only used after the title, after the correspondence author and
	after the keywords (i.e. before the separating line)
4.3	There should not be any other extra line break throughout the whole article.
5	Authors' Affiliation Section
5.1	Full names of the authors need to be included. Do not state initials for first names. Initials for the middle names are acceptable.
5.2	First name should be mentioned first, followed by middle names (if any) and then the last name.
5.3	There should be an "and" before the name of the last author. The "and" should not be preceded by any comma (,).
5.4	Only "eligible" authors should be included in this section, who has significant contributions in the actual research (not to confused with financial or other contributions). AETiC is very strict regarding inclusion of sleeping authors. If there are more than five authors, a "detailed" justification should be provided at the end of the article in the form of "contribution" section – clearly indicating the contributions of each authors and demonstrating how their inclusion as an author is justified.
5.5	There should not be more than one corresponding author. Maximum two can be allowed in mitigating circumstances, with approval from AETiC editorial board.

5.6	
	For list of authors, Font: Palatino Linotype, Font Size: 11, Alignment: Centred, No
	Indentation, Spacing: Before (0), After (6 pt.) and Line Spacing (Single).
5.7	For affiliations, Font: Palatino Linotype, Font Size: 10, Alignment: Centred, No Indentation, No Spacing before and after with Line Spacing: Single.
5.8	For email IDs, Font: Palatino Linotype, Font Size: 9, Alignment: Centred, No Indentation,
<b>5.</b> 0	No Spacing before and after with Line Spacing: Single.
5.9	Email IDs need to be semi-colon(;) separated. The semi-colons should not be underlined.
5.10	Institutional email IDs are preferred over personal email IDs.
5.11	Please keep your affiliations as succinct as possible (for example, do not differentiate among departments of the same organization).
5.12	For affiliations the names of the university/institution, city and country are enough – no
	need to mention other information such as department.
5.13	Affiliations should be indicated by the use of numbered superscripts without any space –
	after the authors' names as well as before the matching names of the universities/institutions.
5.14	If there is only one author or all the authors are from the same organisation, there is no
	need for the numbered superscripts.
5.15	Corresponding authors should be indicated by superscripted star (*) after the
	corresponding author's name and then mentioning the respective email ID after in the last
	line of the authors affiliation section (e. g. *Correspondence: xyz@zyx.org). For single
= 40	authored article, there is no need to indicate corresponding author.
5.16	Multiple affiliations of the same author, including corresponding authorship, should be
	expressed in comma (,) separated superscripts.
6	Article Type
6.1	Article Types: Research or Review
6.2	The article type should be clearly indicated on the top left of the article title, as shown in
	the template.
6.3	Font: Palatino Linotype, Font Size: 10, Alignment: Left, No Indentation, Spacing: Before (12
	pt.), After (0) and Line Spacing (Single).

16.1 Heading style should be same as the first level heading but without being numbered. (S
section 10)
16.2 Texts should be formatted as ordinary body texts. (See section 11)
This section is intended for stating any funding sources or to mention the contribution someone who "actually" helped in conducting the research but does not qualify as a author. Nothing else should be included in this section.
17 Conflict of Interest
17.1 Heading style should be same as the first level heading but without being numbered. (S section 10)
17.2 Texts should be formatted as ordinary body texts. (See section 11)
17.3 If there is no conflict of interest to declare, this section is not needed.

10	Note
18	
18.1	Heading style should be same as the first level heading but without being numbered. (See section 10)
18.2	Texts should be formatted as ordinary body texts. (See section 11)
18.3	This section can be optionally used to declare anything that needs the authors attention.
	Otherwise, it can be ignored.
19	References
19.1	References should strictly adhere to the IEEE Reference Order style, as shown in the template.
19.2	AETiC follows British style of referencing – the comma after the title of any article should
	be outside the quotation marks – not before the ending quotation mark.
19.3	References should include as much information as possible such as volume, issue, page numbers, DOI, ISBN/ISSN, publisher, country etc. Particularly, the DOI is very important. References with incomplete information are not acceptable.
19.4	DOIs should not be used as URLs and vice versa.
19.5	References should be in the order of their citation, starting from [1].
19.6	"et al." should be mentioned exactly as it is stated here. It should be in italic font.
19.7	Wikipedia or similar other sources should not be used as reference.
19.8	URLs to online materials do not qualify as references. They should rather be used as
	footnote, using MS Word's "Insert Footnote" tool under "References" tab. (See section 20)
19.9	References should be auto numbered.
19.10	For articles having upto five authors, the names of all the five authors should be included – use of "et al." is not acceptable. There should be an "and" before the name of the last author. The "and" should not be preceded by any comma (,).
19.11	For articles having more than five authors, the first five authors should be mentioned and
	then it should be followed by "et al.". There should not be any "and" or comma (,) before "et al.".
19.12	For in-text citations in the body of the article, authors' names can also be used along with numbered citation, such as "Abc and Xyz [1] stated that", without any comma (,) before the "and". In such cases, only the surnames should be mentioned, NOT first names. For more than two authors, only the mention of the first author's surname is required, followed by "et al." in Italic.
19.13	Full names of the authors need to be included. Do not simply state initials for first names. Only exception is when the original article does not state the full names of the authors.
19.14	First name should be mentioned first, followed by middle names (if any) and then the last name.
19.15	For a review article, the reference list should include no less than 50 articles – including key
	references in the domain as well as the recent ones.
19.16	For a research article, the reference list should include no less than 20 articles – including
	key references in the domain as well as the recent ones.
19.17	References to any articles in the pre-print servers, such as arXiv, SSRN etc., is only acceptable for the recently published ones. Articles older than six months should rather
10 10	refer to the version originally published in the journal/conference.
19.18	Palatino Linotype font of size 9 should be used for the list of references - Alignment: justified; Indentation: Left (0), Right (0), Special (Hanging by 0.63 cm); Spacing: Before (0), After (0), Line Spacing (Single).
19.19	Reference heading should be similar to other regular heading but without having any heading number. (See section 10)

19.20	Full names of the journals/conferences need to be mentioned. Abbreviations are not
	allowed.
19.21	Stacked references, such as [21,22,23,24], should be hyphenated, such as [21-24].
19.22	Reference to any degree thesis is only acceptable if it is available online. Authors need to
	provide online URL for such references or completely remove them.
19.23	Each reference should end with full-stop (.)
20	Footnotes
20.1	Footnotes should be created using "Insert Footnote" under "References" tab of MS Word.
20.2	Footnote texts should be formatted as – Alignment: Justified, no Indentation, Spacing:
	Before (0), After (0 pt.) and Line Spacing (Single), Font: Palatino Linotype, Font Size: 8.
21	Copyright Information
21.1	The copyright information, at the end of the list of references, should NOT be removed or
	altered.
22	Spelling Convention
22.1	AETiC prefers British convention for spelling and other related matters. However, any
	other conventions for spelling is acceptable. That being said, authors need to be consistent
	throughout the whole article i.e. mixed conventions are acceptable.
